Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 246, Nos. 1 & 2, April 2003

VASCULAR BIOCHEMISTRY
Drs. Peter Zahradka, Jeffrey Wigle and Grant N. Pierce

Preface 1

B. Fernández, A. Kampmann, F. Pipp, R. Zimmermann and W. Schaper: Osteoglycin expression and localization in rabbit tissues and atherosclerotic plaques 3–11

A. Aires Ferreira Rodrigues Borges and O. Moreira Gomes: Effects of midazolam on the contraction and relaxation of segments of thoracic aorta stripped of endothelium and stimulated by adrenaline – experimental study in rabbits 13–17

D. Bia, J.C. Grignola, R.L. Armentano and F.F. Ginés: Improved pulmonary artery buffering function during phenylephrine-induced pulmonary hypertension 19–24

J. Tarchalski, P. Guzik and H. Wysocki: Correlation between the extent of coronary atherosclerosis and lipid profile 25–30

Y.J. Jiang, B. Lu, P.C. Choy and G.M. Hatch: Regulation of cytosolic phospholipase A_2, cyclooxygenase-1 and -2 expression by PMA, TNFα, LPS and M-CSF in human monocytes and macrophages 31–38

S. Maruyama, K. Kato, M. Kodama, Y. Okura, S. Hirono, K. Fuse, H. Hanawa, O. Nakagawa, M. Nakazawa, T. Miida, E. Yaoita, T. Yamamoto, I. Inoue and Y. Aizawa: FR167653 suppresses the progression of experimental autoimmune myocarditis 39–44

P. Ostadal, D. Alan, P. Hajek, D. Horak, J. Vejvoda, J. Trefanec, M. Mates and J. Vojacek: The effect of early treatment by cerivastatin on the serum level of C-reactive protein, interleukin-6, and interleukin-8 in the patients with unstable angina and non-Q-wave myocardial infarction 45–50

M. Franco, G. Castro, L. Romero, J.C. Regalado, A. Medina, C. Huesca-Gómez, S. Ramírez, L.F. Montaño, C. Posadas-Romero and O. Pérez-Méndez: Decreased activity of lecithin:cholesterol acyltransferase and hepatic lipase in chronic hypothyroid rats: Implications for reverse cholesterol transport 51–56

D. Scholz, S. Thomas, S. Sass and T. Podzuweit: Angiogenesis and myogenesis as two facets of inflammatory post-ischemic tissue regeneration 57–67

G.X. Shen: Impact and mechanism for oxidized and glycated lipoproteins on generation of fibrinolytic regulators from vascular endothelial cells 69–74

R.B. Singh, N.S. Neki, K. Kartikey, D. Pella, A. Kumar, M.A. Niaz and A.S. Thakur: Effect of coenzyme Q10 on risk of atherosclerosis in patients with recent myocardial infarction 75–82

D.H. Morris: Methodologic challenges in designing clinical studies to measure differences in the bioequivalence of n-3 fatty acids 83–90

S. Hirono and G.N. Pierce: Dissemination of *Chlamydia pneumoniae* to the vessel wall in atherosclerosis 91–95

M. Chen, L.Y. Li and Y.-P. Qi: Bcl10 protein can act as a transcription activator in yeast 97–103

P. Zahradka, N. Yurkova, B. Litchie, M.C. Moon, D.F. Del Rizzo and C.G. Taylor: Activation of peroxisome proliferator-activated receptors α and γ1 inhibits human smooth muscle cell proliferation 105–110

C.J.A. Hirst, M. Herlyn, P.A. Cattini and E. Kardami: High levels of CUG-initiated FGF-2 expression cause chromatin compaction, decreased cardiomyocyte mitosis, and cell death 111–116

S. Asgary, G.H. Naderi, N. Sarrafzadegan and M. Gharypur: *In vitro* effect of nicotine and cotinine on the susceptibility of LDL oxidation and hemoglobin glycosylation 117–120

M.J.B. Kutryk and B. Ramjiawan: Plasmid lipid and lipoprotein pattern in the Inuit of the Keewatin district of the Northwest territories 121–127

R.M. Levin, A. Borow, S.S. Levin and N. Haugaard: Effect of DHLA on response of isolated rat urinary bladder to repetitive field stimulation 129–135

M.L. Dubey, R. Hegde, N.K. Ganguly and R.C. Mahajan: Decreased level of 2,3-diphosphoglycerate and alteration of structural integrity in erythrocytes infected with *Plasmodium falciparum in vitro* 137–141

Y. Duraisamy, J. Gaffney, M. Slevin, C.A. Smith, K. Williamson and N. Ahmed: Aminosalicylic acid reduces the antiproliferative effect of hyperglycaemia, advanced glycation endproducts and glycated basic fibroblast growth factor in cultured bovine aortic endothelial cells: Comparison with aminoguanidine 143–153

R. Reynoso, L.M. Salgado and V. Calderón: High levels of palmitic acid lead to insulin resistance due to changes in the level of phosphorylation of the insulin receptor and insulin receptor substrate-1 155–162

D.L. Santos, C.M. Palmeira, R. Seiça, J. Dias, J. Mesquita, A.J. Moreno and M.S. Santos: Diabetes and mitochondrial oxidative stress: A study using heart mitochondria from the diabetic Goto-Kakizaki rat 163–170

H. Rashid and S. Tayyab: Interaction of bilirubin with native and protein-depleted human erythrocyte membranes 171–177

Y. Gan, E. Taira, Y. Irie, T. Fujimoto and N. Miki: Arrest of cell cycle by Amida which is phosphorylated by Cdc2 kinase 179–185

M. Chmielewski, E. Sucajtys, J. Swierczynski, B. Rutkowski and W. Bogusławski: Arginine deprivation and tumour cell death: Arginase and its inhibition 187–191

G.A. Naderi, S. Asgary, N. Sarraf-Zadegan and H. Shirvany: Anti-oxidant effect of flavonoids on the susceptibility of LDL oxidation 193–196
